These bolt kits and stud kits are designed for use in PVC or CPVC flange applications. Bolt kits are designed to be used for connecting two PVC or CPVC flanges of the same size with a gasket in between. Gaskets are sold separately. Bolt kits and stud packs are named using the size of flange they are made to be used with. All kits available in either zinc or stainless steel material. Visit pvcfittingsonline.com for more info.

Information refers to bolt kits and stud packs sold on PVC Fittings Online - pvcfittingsonline.com
